

Cleanse, protect and restore, in one easy step.

Spend less time cleaning patients' skin after episodes of incontinence – while you help them feel cleaner, more comfortable and protected. New 3M™ Cavilon™ Continence Care Wipes are a convenient, time-saving alternative to plain soap and water. These disposable, hypoallergenic wipes are designed to gently cleanse, moisturise and provide an effective barrier against moisture and bodily fluids. Used regularly, they can be an effective first line of defence against painful and persistent incontinence associated dermatitis (IAD).
