# SECURA<sup>®</sup>: Your first line of defence in preventive skin care

Easy. Effective. Economical. The SECURA<sup>®</sup> difference.

SECURA<sup>®</sup> is formulated with quality ingredients that make the difference between basic care and proactive prevention. The user-friendly, colour-coded packaging reflects the 3 step skin care system that defines the process of care for prevention.

Routine perineal skin care consists of a simple three step process for good skin care management<sup>1</sup> - cleansing, protection and moisturising - which SECURA<sup>®</sup> can offer:

## 1. Cleanse

## 2. Protect

## 3. Moisturise

SECURA<sup>®</sup>. Be confident in your choice.

# SECURA<sup>®</sup> provides a simple three step process for optimal skin care management

## 1. Cleanse

### SECURA<sup>®</sup> Cleanser

- pH balanced and pH buffered
- No-rinse, one-step all over body cleanser saves time
- Ideal for the perineal area
- Creates a protective film over the skin<sup>2</sup>
- Contains aloe and glycerin to condition and moisturise skin
- Helps control odour
- Paediatric<sup>3</sup> tested for safety

## 2. Protect

### SECURA<sup>®</sup> Barrier Cream D

- Dual action as a moisturiser and barrier cream
- 5% Dimethicone provides maximum protection
- Won't clog incontinence briefs
- Transparent application allows for visual inspection of skin
- Paediatric<sup>4</sup> tested for safety

### SECURA<sup>®</sup> Extra Protective Cream Z30

- Contains 30% zinc oxide
- Contains Karaya to absorb moisture and adhere to weepy, macerated skin
- Will not wash away after repeated exposure to urine and faeces
- Can be used around the peri-wound and stoma areas to protect from maceration
- Paediatric<sup>3</sup> tested for safety

## 3. Moisturise

### SECURA<sup>®</sup> Moisturizing Cream

- Restores moisture to very dry skin
- Conditions, soothes, rehydrates
- Absorbs quickly, non-greasy
- Fortifies moisture balance
- Contains petrolatum and vitamin E
- Non-irritating<sup>5</sup>, non-sensitising<sup>6</sup>

### SECURA<sup>®</sup> Moisturizing Lotion

- Use daily to moisturise dry skin
- Easily absorbed, non-greasy
- Maintains healthy skin, protecting the skin's acid mantle
- Fragrance-free
- Non-irritating<sup>7</sup>, non-sensitising<sup>8</sup>

## Cleanse

Traditional regimes such as soap and water can be detrimental to the skin as they may not be PH balanced and scrubbing this skin is abrasive. SECURA Cleanser is superior to soaps because the surfactants in the formula lift body waste away from the skin without harsh scrubbing. SECURA Cleanser is also pH balanced and helps to maintain the natural pH of the skin.

## Protect

Moisture barriers help shield the skin from exposure to irritants and excess moisture. A barrier cream such as SECURA Barrier Cream D helps protect the skin by sealing out wetness and reducing exposure to urine and faeces. SECURA Extra Protective Cream Z30 is a more durable and long lasting protectant, providing a high level of protection for patients with severe diarrhoea, incontinence and denuded skin.

## Moisturise

Moisture barriers protect the skin from irritants such as urine, faeces and excess moisture. Well hydrated and intact skin is less prone to damage. Skin moisturisers may help prevent water loss and improve skin hydration. Regular application of moisturising cream or lotion protects and reduces the effects of dry skin, a known risk factor for skin tears. SECURA moisturising cream and SECURA moisturising lotion are gentle to sensitive skin, absorb quickly and help restore moisture to the skin.
